

Seminář Astronomického ústavu UK **Seminar of the Astronomical Institute of CU**

→ pravidelně ve **středu**/regularly on **Wednesdays** od/from **10:10**
→ posluchárna/lecture room **T1** (V Holešovičkách 2, 180 00 Praha)

- 7.12.2022 **A possible alternative to dark matter on galactic scales**
presented in English by: **Roberto Capuzzo Dolcetta**
(Sapienza University of Rome, Italy;
Enrico Fermi Study and Research Center, Rome, Italy)
- 14.12.2022 **Estimating the ages of open star clusters
from properties of their extended tidal tails**
presented in English by: **František Dinnbier**
(Astronomical Institute of Charles University, Prague)
- 21.12.2022 **Spectrum of the secondary component
and refined orbital elements of the massive triple δ Ori A**
presented in English by: **Alžběta Oplištilová**
(Astronomical Institute of Charles University, Prague;
European Southern Observatory, Garching, Germany)
