Zoom

Phase of rotation

Interaktivni 3D obrazek

With $P = 2\pi/\omega = \text{const}$, the fit was not perfect – phase shifts between the model and observatios.

When assuming that $d\omega/dt = v$, $\omega = \omega_0 + 1/2 v t$. Both ω_0 and v are free parameters of the optimization.

Summary

- The **first main message** of your talk in one or two lines.
- The **second main message** of your talk in one or two lines.
- Perhaps a **third message**, but not more than that.
- Outlook
 - Something you haven't solved.
 - Something else you haven't solved.
